

## ISOLETTE COVERS

These are special purpose covers used by staff in Neonatal intensive care units (NICU) and special care nurseries (SCN).

They are used to lay over an Isolette to control the light environment of the neonate.

One side should be dark and one side should be a light colour, staff will turn to each side as appropriate.

The cover also adds a homely effect to detract from the 'medical' feel of the unit and is of comfort to the parents.

These covers are kept by the hospital but may be offered to parents to take home.

### *GUIDELINES :*

**Fabric:** cotton only

Covers may be pieced, panels or both

One side light colours.....for day

One side dark .....for night

May be quilted

**Wadding:** thin wadding is OK ie pellow/flannel to block light getting through cover...not always required
