Website – www.glorialoughman.com

Size: Flexible but suggest 40 cm x 60 cm (16.5" x 23")

Using the colours and patterns of the landscape you will create an original design highlighting the contours of the land. Contour lines create the gradient of the land and allows the projection of wonderful perspective and contrast into our design. The techniques outlined in this class will allow you to make these contours a feature. Focal point, perspective and other basic design principles will be discussed and students will design their own wall hanging working from a photo, sketch or picture. Students will be guided through a process that involves cutting and fusing the contours, then building up the areas on the batting. Machine quilting will add further dimension and texture. Fabric painting techniques will be demonstrated and participants will be able to hand paint fabric for special areas, eg sky and sea etc. Some basic machine sewing skills required.
