

## Three Day Workshops

---

### 1 *Aurora Rose* with Rachelle Denny

Sat 14 / Sun 15 / Mon 16

Size - 210 cm square or 88" square

*Aurora Rose* was designed as Rachelle's 2017 Block of the Month Class. It features a variety of techniques to learn and enjoy. Starting with the gorgeous centre of foundation pieced stars surrounded by curved appliqué, the quilt slowly grows around this with floral appliqué and piecing. Over the three days, the main aspects of the quilt, different appliqué techniques, colour placement and construction will be covered. The design looks fabulous in both modern and traditional fabrics so grab your favourites and let's get started. The class is suitable for skill levels ranging from confident beginner with basic knowledge to advanced. The pattern book will be included as part of the class; an optional acrylic template set will be available for purchase if desired.

### 2 *Dyeing to Print* with Hilary Peterson

Sat 14 / Sun 15 / Mon 16

Using dyes from plants found locally, you will explore various marking making processes, created by simple shibori techniques with fabric or paper if you wish. Simple printing methods, such as lino, easy carve blocks and stencils, with fabric and paper will be investigated. The printing blocks and stencils will reflect your personal interests, and will be taken from reference materials. Hilary will teach you to use layering with a variety of fabrics including sheers and those of heavier weight to create depth and mystery in your work. Hand stitching will give contrast and texture. Suitable for all levels.

## Two Day Workshops

---

### 3 *Fish and Chips* with Leslie Edwards

Sat 14 / Sun 15

Size - 104 cm x 145 cm or 41" x 57"

Leslie's *Fish and Chips* quilt provides an opportunity to have lots of fun with colour. The various fish blocks provide an opportunity to use bright and glittering fabrics.

Pick a solid or "reads like solid" fabric for the fish squares. For the alternate squares, choose a fabric that looks like the sea - blue water, green seaweed, small fish, scuba divers, and dolphins - let your imagination take over. The fish are fused onto the background fabric while the "chips" blocks use improvisational piecing and cutting freeform to create a random looking border. This is a fun and forgiving technique. This class is suitable for all skill levels.
