

QR Code Parking Instructions

To access and exit the carpark, please follow these instructions for scanning your QR code:

1. **Positioning the QR Code:** Hold your QR code steadily under the bottom left section of both the entry and exit columns. Ensure the QR code is facing directly upwards.
2. **Finding the Optimal Scan Position:** Slowly lower and raise the QR code to identify the optimal scanning position.
3. **Using a Smartphone:** If you are using your phone, please increase the screen brightness for better readability.
4. **Printing the QR Code:** We do not recommend printing your pass but if you choose to print the QR code, ensure that the code itself is no larger than 2cm x 2cm.

Should you encounter any entry/exit issues with the code, simply press the phone button- our intercom is always staffed.

Please remember to

- Drive safely and slowly when within the Showground
- Only park in designated areas
- Keep your code for your personal use only and do not share it with anyone
